**Election/restriction**

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- I. Claims 1-12, drawn to a product of an electrode of plasma display panel, classified in Class 313, subclass 584.
- II. Claims 13-20, drawn to a method of manufacturing an electrode of a plasma display panel, classified in Class 445, subclass 46.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (M.P.E.P. § 806.05(f)). In the instant case, the product of an electrode of a plasma display panel can be made by another and materially different process such as by selectively depositing electrode material to form pattern of electrodes or mechanically removing electrode material to form pattern of electrodes.

A telephone call was made to Mr. M Qualey on 7-19-05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be

Art Unit: 2879

accompanied by a diligently filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.
